

Personal project 1 (2023-2025)

Godot 3.5

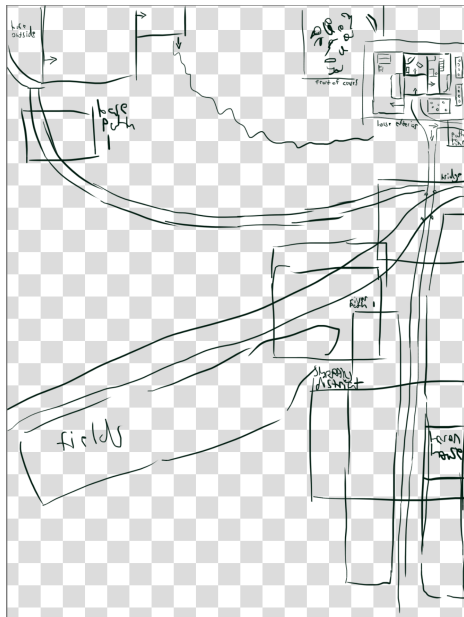

This is a game inspired by RPG maker horror games like Ib and The Crooked Man. The main idea was to have a cast of characters moving through a house and doing secret actions while the player character tries to avoid them. The player can listen in on their conversations and influence their behavior to avoid getting caught.

More assets from this game (including animated GIFs) are displayed in my web portfolio at jordanssalazar.github.io

Visual novel prototype 1 (2024-2025)

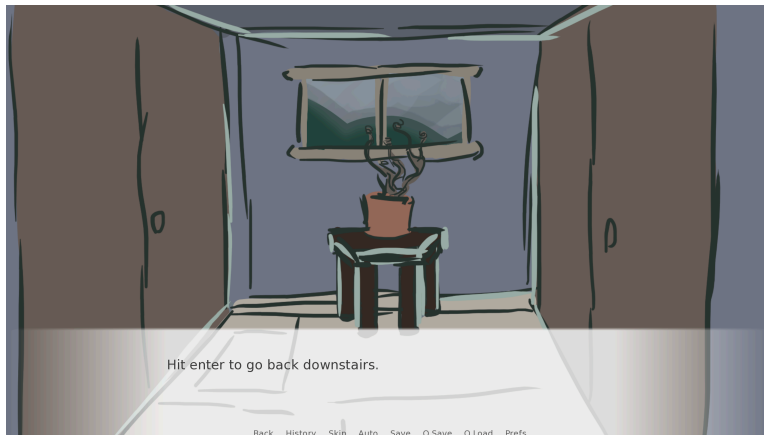

Created a text-parser feature in Ren'py 8.1.1

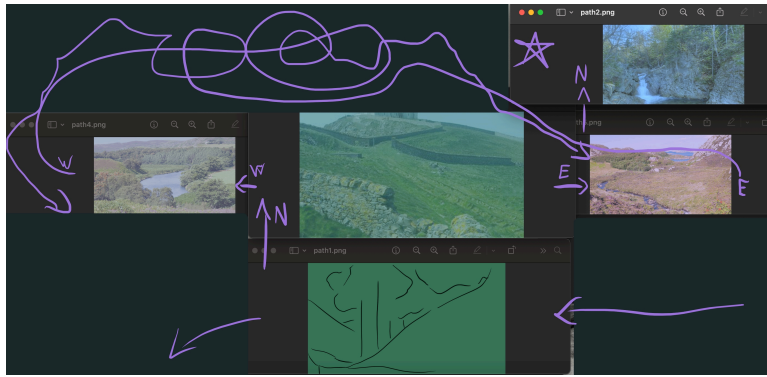

```

1
2 Label confused:
3     "Unfortunately, you can't do that here."
4     $ renpy.jump(lastArea)
5
6 Label talkto:
7     "Talk to who?"
8     $ renpy.jump(lastArea)
9
10 Label lookat:
11     "Look at what?"
12     $ renpy.jump(lastArea)
13
14 Label use:
15     "Use what?"
16     $ renpy.jump(lastArea)
17
18 Label alreadylooks:
19     "You already have that item in your inventory."
20     $ renpy.jump(lastArea)
21
22 Label take:
23     "Take what?"
24     $ renpy.jump(lastArea)
25
26 Label enter:
27     "Enter where?"
28     $ renpy.jump(lastArea)
29
30 Label progress:
31     "You must make a decision here to progress the story."
32     "If you're stuck, try (b)"lookA"/(b) to see interactable objects, or you can always type (b)"cmd"/(b) for a full list of commands!"
33     $ renpy.jump(lastArea)
34
35 Label cmd:
36     "Commands: (b)look, talk to, look at, use, take, enter, north, south, east, west, n, s, e, w, inventory, history/(b)"
37     "If you use the (b)"lookA"/(b) command, some interactable objects may be painted out."
38     "Additionally, you can sometimes (b)use/(b) some items from your (b)inventory/(b)."
39     "You can sometimes skip optional sections by simply pressing enter."
40     $ renpy.jump(lastArea)
41
42 Label inventory:
43     if inventory:
44         python:
45             invString = ""
46             for i in inventory:
47                 invString += i+"\n"
48             renpy.say(inv, invString)
49     else:
50         "Inventory is empty!"
51         $ renpy.jump(lastArea)
52
53 Label history:
54     if history:
55         python:
56             histString = ""
57             for h in history:
58                 histString += h+"\n"
59             renpy.say(his, histString)
60     else:
61         "Every choice you make on your playthrough will be recorded here."

```

The idea for this game was to have a mystery where the end of each “route” gives you a hint for how to progress the investigation on the next play through. There are intervals where instead of linearly progressing to the next location, you have to navigate there through a text prompter and solve a few puzzles. During this time there would be things that you probably wouldn’t think to do unless you had the information from the last ending.

This was a mock-up for a short puzzle where you have to navigate through some nonlinear paths, making use of the text adventure-like setup.

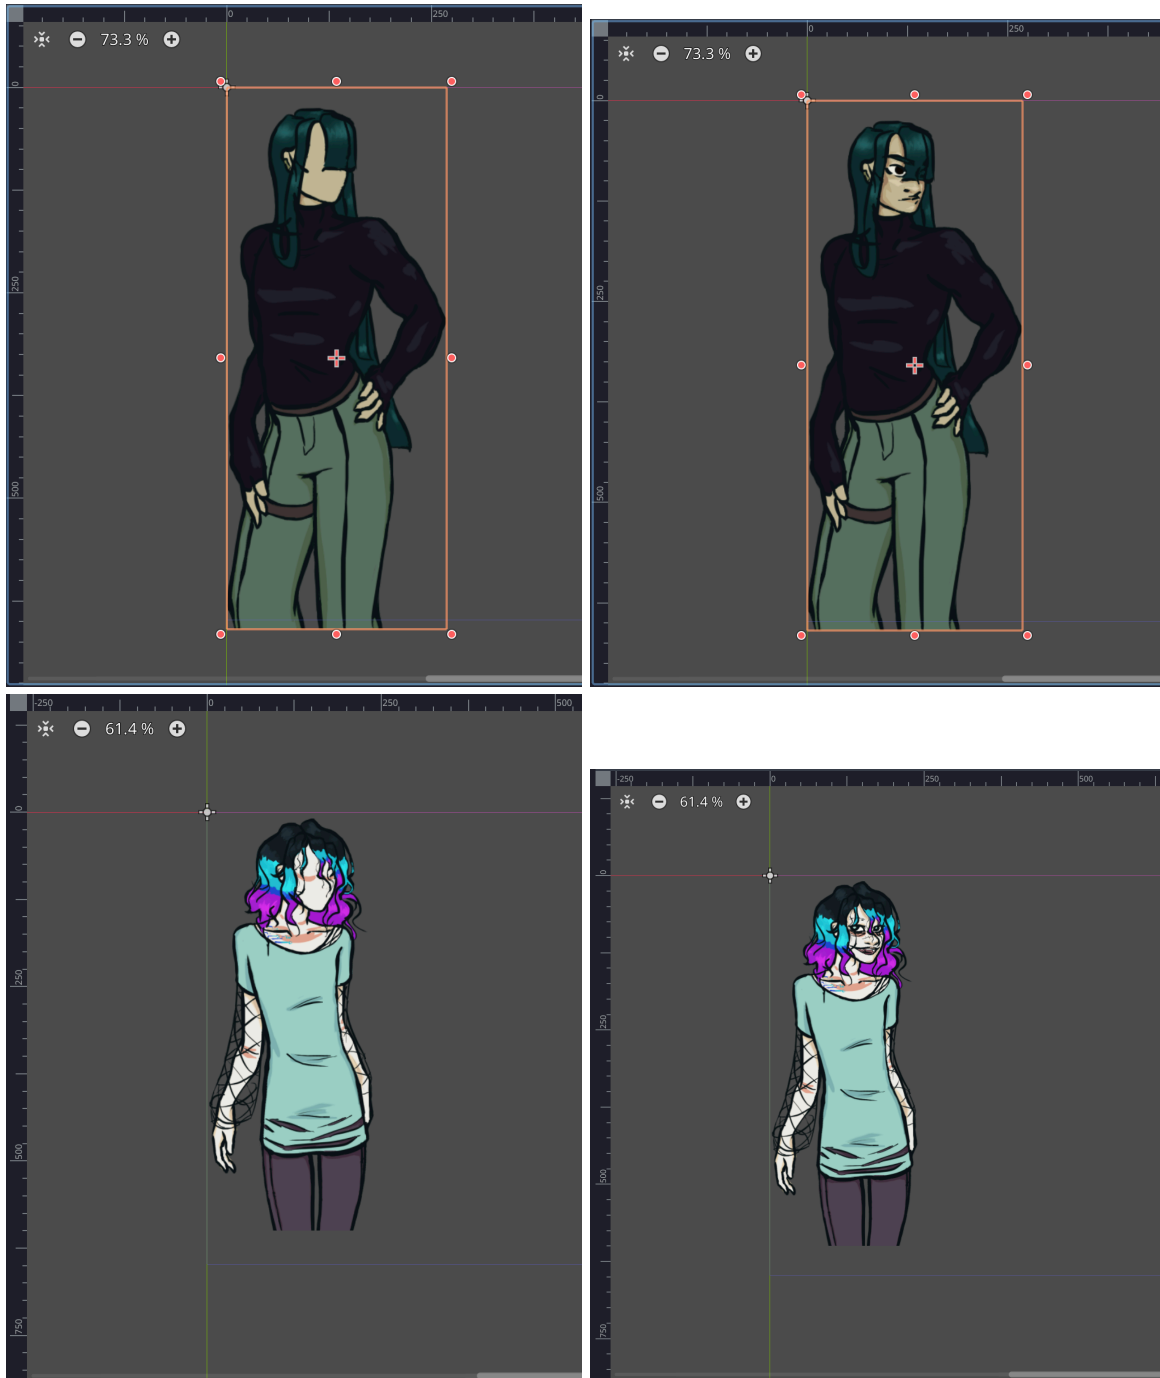

On this page and the next page are some very quick sprites I made for this game.

Visual novel prototype 2 (2024-2025)

Godot 4.2

Used Dialogic 2 to create layered portraits

Experimented with the Dialogic 2 plugin for Godot 4, integrating it into a custom UI system

4X Strategy Game (2024-2025)

Worked on a team with three other artists

Created: Lighter green (plains) base tile, gray (tundra) base tile. Mountain, forest, rainforest, oasis, and marsh tile overlays.

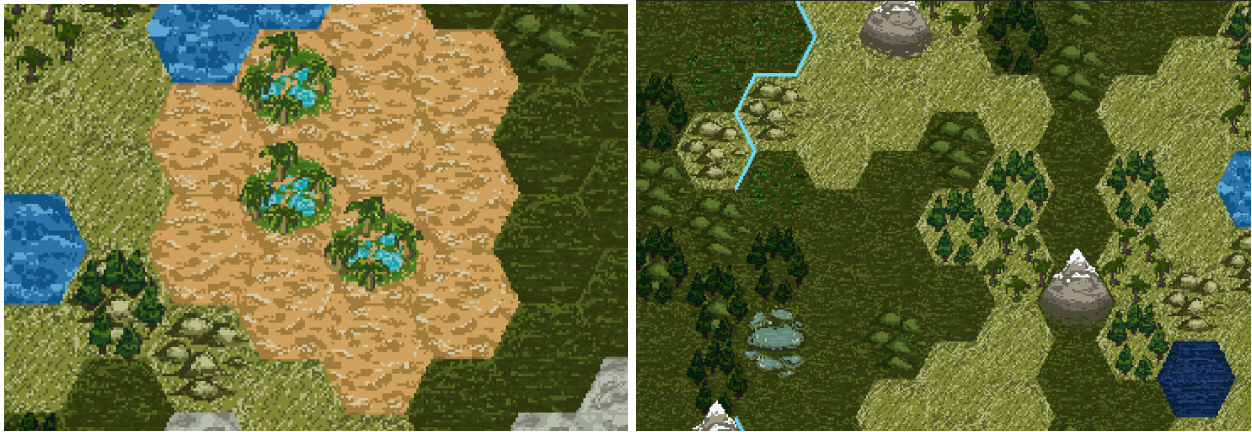

Edited dark green (grasslands) tile to make it tile smoothly and create a uniform texture. Edited desert tile and light blue (coast) tile to maintain a cohesive color palette among assets.

Guided production of all other art to maintain a standard of quality, clarity and stylistic cohesion between artists while still meeting deadlines and allowing everyone their own ideas and process

[Link to trailer video](#)

Art from slightly earlier stages of production

Army Man Game (2024)

Created for the UC Davis Fall quarter 2024 game jam

Created 2D art assets (playing piece designs)

<https://jfo-ucdavis.itch.io/armyman>

Hook Hero (2024)

Solo artist, worked on a team with three other programmers

Created lighting effects

Created a player sprite, including jump and fall frames and a running animation:

Created a tilesheet with working auto-tile in Godot 4.2

Stray Stars (2023)

Worked on front-end programming in Godot 3.5

<https://bluekkachi.itch.io/stray-stars>
